Fluid management, made easy.

Thermedx® FluidSmart® Fluid Management System
A Multidiscipline Fluid Management Solution
The FluidSmart® System provides real-time deficit monitoring and fluid warming for patient safety. This multifunctional system can be used for a variety of procedures in gynecology and urology.*

**Gynecology:** hysteroscopy (diagnostic and operative, including hysteroscopic tissue removal)

**Urology:** cystoscopy, TURP, PCNL, ureteroscopy

---

**Fluid Deficit Monitoring**
Real-time monitoring and display of fluid deficit.

**Non-Pulsatile Flow**
Provides clear visualization during a procedure.

**Enhanced Safety Features**
Adjustable alarms for perforation, deficit, and pressure.

**User-Friendly**
User can change fluid bags and canisters without disrupting a surgical procedure.

---

**Fluid Warming**
On-demand fluid warming to help prevent intraoperative hypothermia.

**Adjustable Pressure Settings**
Maintain control of the surgical site.

**Proprietary Luer-Lock Adapters**
For all urological procedures, including ureteroscopy (for use up to 300 mmHg).

**Automatic Flow Rate**
Provides constant pressure for even distension.

---

*Indicated for use in gynecology, urology, and orthopedics.
Simple Touchscreen Operation

On-Demand Fluid Warming

Peristaltic Pump Provides Non-Pulsatile Flow
