A Petite Solution for Bipolar Resection

Slender 7 mm resectoscope for improved efficiency
The Princess is a uniquely petite resectoscope, from Richard Wolf Medical Instruments, with an outer diameter of 7 mm. It is used with the 12° PANOVIEW telescope. The Princess’s small dimensions allow for significantly reduced dilatation and resistance upon insertion, as well as precise dissection.

The petite dimensions of the Princess make it ideal for use in patients with:
- Cervical Stenosis
- Fertility issues

**Double sheath system** permits 360° rotation and ensures more freedom of movement.

**Slender 7 mm diameter for**
- Reduced dilatation effort
- Significantly less insertion resistance
- Substantially less trauma to the cervical canal
Bipolar vaporization electrode "BiVAP"

The new BiVAP bipolar vaporization electrode is the ideal solution for ablation of endometrial tissue and myomas.

- Optimized electrode shape
- Continuous clear field of view
- Fast and effective tissue vaporization

*The hook electrode may be used in bipolar or monopolar applications*
Slender 7 mm diameter for improved efficiency

**Optional accessories**

- **Working insert for auxiliary instruments**
  up to 7 Fr. ......................... 8653284

- **HF bipolar connection cable**
  for Erbe, 3 m ..................... 8108.232

- **HF monopolar connection cable**
  for Valley lab, Bovie, Conmed, 3 m ..................... 815.033

- **Flexible fiber light cable**
  fiber bundle Ø 2.5 mm
  (green color/marking green), length 2.3 m ..................... 806625301

- **Scope Protector**
  5/pkg .................................. 8570.9325

- **Universal Reprocessing Tray**
  22.8" L x 11.1" W x 3.8" H
  ........................................ 8585.023
