Precise Dissection and Coagulation in a Slim 5 Fr. Diameter

BipoTrode™ Bipolar Electrode
Precise Dissection and Coagulation in a Slim 5 Fr. Diameter
BipoTrode™ Bipolar Electrode

The 5 Fr. BipoTrode Bipolar Electrode was designed for precise dissection and coagulation in both the office and OR settings.

Expanded Treatment Options

- Slim 5 Fr. outer diameter allows for easy dissection and coagulation in both the office and OR settings
- Small distal tip enables greater access to regions that a standard resection loop or roller ball may not be able to reach, such as a uterine septum

Lower Total Cost of Ownership

- Reusable and autoclavable design enables a lower total cost of ownership when compared to disposable designs
- Unique semi-flexible shaft provides the optimal blend of strength and flexibility

Easy Integration into Existing Equipment

- Semi-flexible shaft can be used with any hysteroscope or operating sheath with a straight or curved 5 Fr. working channel
- Bipolar capability is designed to work with virtually any existing bipolar generator
