Cystoscopy Tray, Urology Resection Tray, and Pediatric All-in-One Tray

Custom Protection, Ultimate Security
Customer-Driven Design

The reprocessing needs of the Central Processing Department (CPD) and the Perioperative Department are answered with the new Richard Wolf Urology Trays—providing custom protection with ultimate security.

The CPD is an essential element to hospital operations. Daily demands can be challenging, and every expenditure is scrutinized in this cost conscious healthcare environment. The new urology tray line from Richard Wolf is designed to help ease the financial burden of maintaining instruments as well as offering unparalleled scope protection.

- Inventory management made easier with trays that fit both adult or pediatric endoscopes and instruments
- Assembly completed accurately with brackets that have both outline and label guides for every instrument
- Sterility maintained by specially designed soft tray corners and molded feet to reduce torn wrappers

Key Features: Tray and Bracket Construction

A Place for Everything and Everything in Its Place

- Utility box with silicone mat for small, loose components and accessories
- Outline and label guides for each endoscope and instrument bracket
- Placeholder for light and electrical cables

Safety First

- Trays are designed to secure the endoscopes and instruments into the brackets during tray transport
- Soft silicone scope brackets use a side approach to help prevent scope damage and can be used with or without a scope protector
Cystoscopy Tray (8585030)

- Enables optimal configuration with two tray levels for basic cystoscopy endoscopes and instruments
- Includes placeholder for light cable
- Contains utility box for accessories

**LEVEL 1**

- Convenient utility box for accessories
- Instrument outlines guide CPD and OR staff during tray assembly
- Light cable fits conveniently in perimeter of tray

**LEVEL 2**

- Brackets secure adult and pediatric urology instruments (adult shown here)
- Brackets secure adult and pediatric endoscopes, with or without scope protectors (pediatric shown here)
- Enables optimal configuration with two tray levels for urology resection endoscopes and instruments
- Includes placeholder for HF cable
- Contains utility box for accessories

**LEVEL 1**
- HF cable fits conveniently in perimeter of tray
- Uniquely designed brackets hold pediatric stricture knives and reusable loops

**LEVEL 2**
- Convenient utility box for accessories
- Uniquely designed brackets fit adult or pediatric sheaths (adult shown here)
Pediatric All-in-One Tray (8585038)

- Fits pediatric all-in-one scopes with integrated sheaths (either offset or straight eyepiece)

Uniquely designed brackets fit either one or two offset scopes, and one straight eyepiece scope

Instrument outlines guide CPD and OR staff during tray assembly

Light cable fits conveniently in perimeter of tray

Scope Protectors

- Only scope protector, on the market, validated for use during sterilization
- Fits straight eyepiece scopes up to 5 mm diameter
- Available in two lengths (20 cm WL, 32 cm WL)
**Quick Reference and Ordering Information:**

### Cystoscopy Tray

**Fits adult and pediatric endoscopes and instruments**

- with the **maximum capacity of**:
  - 3 rigid urology endoscopes, with or without scope protectors
  - 1 light cable
  - 4 forceps
  - 3 sets of sheaths and obturators
  - 1 Albarran deflector
  - 1 utility box for accessories

### Urology Resection Tray

**Fits adult or pediatric endoscopes and instruments**

- with a **maximum capacity of**:
  - 2 rigid urology endoscopes, with or without scope protectors
  - 3 sets of sheaths and obturators
  - 2 visual obturators
